

DCT411 Remote Control

How to Set-Up to learn another remote's Power, Volume, Channel, TV/AV and Custom

1. This feature is on the upper right hand corner.
2. Hold the "Set" button until the LED is bright Red; it will stay on after you release the button
3. Point the DCT411 Remote to the other Remote and at the "same time" press the desire button to be learned (Power, Volume, Channel, TV/AV or Custom). Example: If the Power needs to be learned, point both controls at each other and press the POWER button of each control at the "same time"
4. If the LED flashed quickly twice, it has learned the other remote's function
5. If the LED flashes and continues to flash, it did not learned the other remote's function and Repeat step 2 thru 5 until the LED quickly flashes twice
